DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 24-42 and 46-47 are rejected under 35 USC §103(a). This rejection is set forth in the prior Office action mailed on May 13, 2003.

Response to Arguments

3. Applicant's arguments filed on October 20, 2003 and August 13, 2003 have been fully considered but they are not persuasive.

Applicants argue the differences between wood-free and wood containing papers and they conclude that the reference teaches a wood-free pulp or paper, which is contrary to their invention, which is wood containing. However, the distinction of one and another is not sufficient clear to indicate the allowability of the claims, based on the cited reference. The Wood free papers and the wood-containing papers are classified based in the lignin content of the pulp, i.e., the mechanical or lignin containing pulp in the paper; however, there seems to be an overlapping range in the amount of lignin containing pulp in the paper, i.e., page 6 of the specification, lines 17-30, indicates wood-free has less than 10% of groundwood or other lignin containing pulp and the wood containing paper has at least

Application/Control Number: 09/701,261

Art Unit: 1731

5% by weight of the lignin containing pulp. As it can be seen a paper containing 5% of a lignin containing pulp is a wood-free and a wood-containing paper at the same time. Also, it seems that the distinction of wood-free and wood containing papers varies from country to country, see page 6, same lines as above. Even more unclear and confusing between the definitions of the terms, the declaration sent by applicants includes a papermaking excerpt from a book or a manual, in which in one part defines Kraft pulp as a wood-free paper, i.e., at the end of page 6, and then in another part is not included as one, i.e., in table of page 29.

Therefore, the paper or pulp used in the process needs to be more clearly defined in order to indicate the allowability of the claims.

Note also that even if the differences between the wood-free and wood-containing papers were resolved, the reference still reads on the paper claims 32-42, since those do not require for the paper to be wood containing.

Conclusion

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1731

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
